

## DESCRIPTION

The YS-2106S ANGLE VALVE is intended for use in water piping which is the same size as the fire protection equipment. Working pressures should not exceed 300 psi.

Model YS-2106S has female NPT thread for end connection, the valve comes in bronze C84400 material of construction.

## INSTALLATION

Installation of the YS-2106S ANGLE VALVE can be accomplished with normal field installation tools. Make sure the valve is installed according to the flow indication arrow that has been cast into the valve body. Use a suitable thread sealant on the external threads of the pipe. Please use PTFE pipe thread sealing tape or a suitable PTFE pipe thread sealant to ensure a positive seal between the valves and the installed pipe.

\*Do not overtighten threads.  
Overtightening may cause valve failure

 **WARNING:** Cancer and Reproductive Harm
